

Term 3—Topic Information

Journey Into Space

Place to visit:

The National Space Centre in Leicester

<https://spacecentre.co.uk/>

Websites to explore:

<https://jwst.org.uk/>

James Webb
Telescope

<http://www.destination-space.uk/mission-modules/>

At home science
projects

Videos about Space:

Find out about the UK Space agency on youtube and listen to Tim Peake talk about the Principia mission.

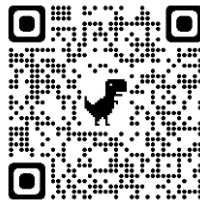

<https://www.youtube.com/user/spacegovuk>

Virtual tours:

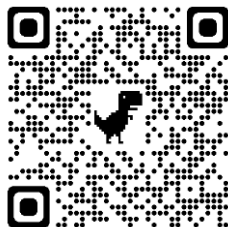

Discover Space exploration
in America with NASA

<https://www.nasa.gov/nasa-at-home-virtual-tours-and-augmented-reality>

Explore the Solar System

<https://nineplanets.org/tour/>

Take a virtual tour of the
International Space Station

<https://esamultimedia.esa.int/multimedia/virtual-tour-iss/>

Activities to try at home:

Make your own space
item using junk modelling
materials or lego.

Make an artefact to put in a museum of
space. You could create anything from a
planet to an alien hand, an astronaut's
diary to a piece of a rocket.

Design your own planet - think about
what it would look like, what the flora
and fauna might be like and what
creatures/aliens might live there. - You
could draw it or make it!
